

STAY ABOVE THE WATERLINE

EXTEND YOUR POTS INVESTMENT WITH THE **C8000**

Provide POTS Service to **ANY** Customer
Regardless of Distance from Central Office or Remote Cabinet

- **Eliminates** need to install new distribution of feeder facilities
- **Eliminates** the need to replace aging cable facilities
- **Enables** service provisioning in areas where no additional facilities can be installed
- **Utilize** for short term temporary installation or long term service delivery

PROVEN SYSTEM WIDELY DEPLOYED WITHIN THE AT&T NETWORK

CONKLIN 8000

Small Digital Loop Carrier (SDLC)

Reach ANY Customer, ANYwhere

Designed to enable the provisioning of POTS services to ANY customer regardless of the distance from the Central Office or Remote Cabinet. The platforms excel in lower density areas, or where loop extensions and/or pair gain is required.

The Conklin 8000 series is a proven system, widely deployed in the AT&T network. It is available for ordering within the 22 state footprint. Product approved and contract pricing available (20070521.042.A.001)

Strengthen Your Strategic Plan and Economic Advantage

Capital is Tight But Service Demands Keep Building

Install small systems immediately while waiting for strategic growth to develop. Systems are fully deployable in all areas enabling the delivery of services, enhancing ROI and forestalling large system capital investment until service area requires a justifiable demand.

Growth Comes in Smaller Increments in Rural Areas

Installation of smaller systems enables service delivery while waiting to see where growth actually appears. Systems can be redeployed in other areas if growth develops and larger service delivery platforms are needed in the future.

System Support

CTDI provides comprehensive support from design through installation and in service.

Design Aid Spreadsheets and Design Engineering Support – Downloadable spreadsheet to configure equipment and facilities. We also have Sales Engineering support to review designs to insure successful deployments

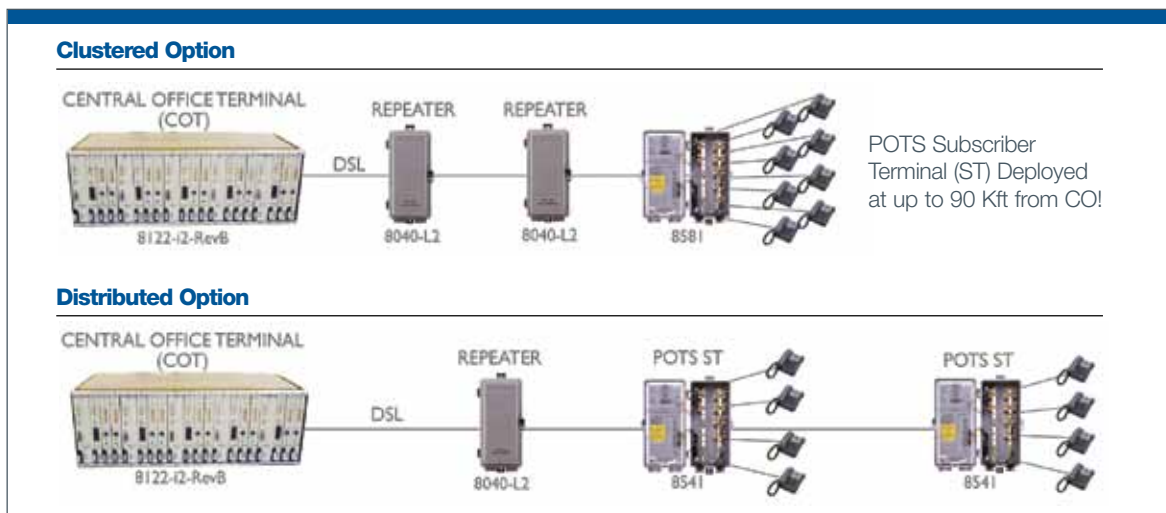

Management and Provisioning Tools – Software available to remotely monitor and provision or can be provisioned at the CO shelf.

Customer Support

Customer Support Staff available 24/7 for emergencies - CTDI has a staffed call in center to take calls 24/7 and route to a number of available staff. L3 TAC center in operation to support any field issue.

Contact your CTDI representative or call **866 953 9030** for Ordering and Delivery Details. You may also email inquiries to productsales@ctdi.com
